

# Dr.WEB®

## Security Space

Comprehensive protection  
for Windows, an anti-virus  
for Mac OS and Linux

Defend what you create

### New version 11

## Comprehensive protection for Windows, an anti-virus for Mac OS and Linux

Protection for mobile devices — for free!

### Features (Windows)

- **Improved!** Comprehensive protection of Windows PC from all types of modern known and latest unknown threats.
- **Improved!** Protection from latest malicious programs designed to bypass detection by traditional signature-based scan and heuristic analysis.
- **New!** Protection from exploits via zero-day vulnerabilities.
- **Improved!** Installation and operation in an infected system.
- **Improved!** Immunity to any attempts of malicious programs to disrupt Dr.Web operation.
- **Improved!** Fast multi-thread scanning powered by multi-core systems.
- **Improved!** Real time protection without interfering with the system performance.
- **Improved!** High performance checking traffic and email without delay when playing online games or streaming video and audio online.
- **New!** The brand-new backup routine to generate and store backups of important files by using the Data Damage Prevention feature. Sparing use of system resources when creating backups of any size!
- Scan of archived files at any nesting level.
- Block access to websites that are used to distribute malicious or potentially dangerous programs, phishing sites, and sites that use social engineering techniques to misguide users..
- Spam and other types of unsolicited messages filtering without training the anti-spam
- **Improved!** Real time scanning of traffic on all ports.
- Secure search in Google, Yandex, Yahoo!, Bing and Rambler – unsafe content is filtered out by the search engines!
- Secure communication – instant messenger traffic filtering.
- **Improved!** Efficient protection of children against exposure to objectionable content.
- **Improved!** Prevent unauthorized use of removable devices and the computer.
- Dr.Web Cloud – instant check URLs on Doctor Web's servers.
- **New!** Cloud reputation service that lets you verify the safety of specific URLs.
- Protection against unauthorized access by a network; blocks suspicious connections on package and application layers.
- Remote administration of other computers in the local network without installing the Dr.Web Control Center.

### Protection components for Windows

**Anti-virus** – blocks viruses and malware from accessing the protected system and will cure the malignant programs that have already penetrated it.

**Firewall** is an impenetrable barrier to hackers attempting to break into your system.

**Spider Gate®** is an HTTP monitor that scans web pages in real-time and blocks phishing websites and other dangerous web resources.

**Anti-spam** – detects spam and other unsolicited messages in any language, with next-to-zero false positives.

**Parental control** blocks access to websites by keywords in their URLs and protects children from exposure to objectionable web content. The "restrict access" feature protects information located on removable data-storage devices and in files and directories, from unauthorised access, theft, and deletion.

With the **Anti-virus network component** you can remotely control Dr.Web anti-viruses installed on computers connected to one local network.

### System requirements

#### Dr.Web Security Space

- Windows 10/8/7/Vista (64-bit) and Windows 10/8/7/Vista/XP SP2 (32-bit).
- RAM: at least 512 MB.
- Free disk space: 1 GB. Temporary Files created during installation will require additional disk space.

#### Dr.Web Anti-virus for Mac OS X

- Mac OS X 10.7 and higher
- RAM—as required by the OS.

#### Антивирус Dr.Web для Linux

- Operating system: GNU/Linux distributions supporting Intel x86/amd64 with kernel 2.6.37 (and later) and glibc 2.13 (and later).
- At least 400 MB of free disk space.

Internet access for registration and updating.

The price includes updating of virus databases and software modules as well as technical support from Doctor Web. <http://support.drweb.com/>
